

## Clean Energy Connections: 'Crafting a Professional Playbook for Clean Energy Financing & Development'

08.22.2012

A successful clean energy project depends on good financial planning. It's time for clean energy organizations, financial services professionals and others to convene to better understand how they can work together to continue to advance the clean energy industry in North Carolina, the Southeast, and the nation. This workshop provides a great way to connect, share ideas and gain insiders' perspectives into the world of clean energy financing.

This forum provides an avenue for accountants, architects, attorneys, financial professionals, clean energy developers, integrators, adopters and others to connect, share ideas and gain insiders' perspectives into the world of clean energy financing. Discussion topics include the fundamentals of clean energy financing and incentives and best practices for funding clean energy projects.

Williams Mullen partner Bob Riley will participate in the panel discussion titled "The Playbook for Clean Energy Financing in NC-Perspectives from Finance, Legal and Developers."

This program has been approved by the NC State Bar for 2.75 hours of general CLE credits. It is also approved for 4 hours of CPE credits for accounting professionals. Credits are pending for architectural and LEED professionals.
