

## Emerging Security & Privacy Issues Arising from the Proliferation of Devices in the Health Care Workplace

06.12.2018

On June 12, 2018, Rob Van Arnam and Dominic Madigan will participate on a panel on "Emerging Security & Privacy Issues Arising from the Proliferation of Devices in the Health Care Workplace" at the North Carolina Healthcare Information and Communications Alliance, Inc.'s (NCHICA's) 14th Academic Medical Center Security & Privacy Conference. The panel will "examine key security and privacy issues arising from the use of electronic devices in and with health care organizations. In part, panelists and the audience will discuss security and privacy issues related to electronic health care data stored on and transmitted from wearable and implantable devices."
