

Complying With ITAR Requirements In Modular Open System Architecture

05.01.2018

On May 1, 2018, Tom McVey will present on "Complying With ITAR Requirements In Modular Open System Architecture" at the Modular Open Systems Summit. The presentation will delve into the topic of ITAR, including what the requirements are mandatory in open standards-based defense systems as well as how to effectively share ITAR-controlled technical data in an open multi-vendor environment.

Also covered will be how defense services are dealing with foreign program partners and subcontractors in open systems, how TAA's are used with other multi-party license authorizations and best practices for the coordination of restrictions on ITAR-controlled technical data and IP data rights.

Attendees to this session will learn:

1. What ITAR data security requirements are necessary for implementation
2. Specific issues surrounding how ITAR regulatory requirements arise in open system operations
3. The legal risks and potential penalties for ITAR violations
4. Practical recommendations for compliance and risk mitigation
