

## PODCAST: What Government Contractors Need to Know About State and Local Taxes

06.12.2018

In this episode of GovCon Perspectives, Tony Anikeeff is joined by special guest Stephanie Lipinski Galland to discuss what government contractors need to know about state and local taxes. Government contractors are subject to the same tax issues as every other business. Every contractor needs to know that contracts with the federal, state or local governments do not provide a special tax treatment, and failure to recognize tax responsibilities can result in negative consequences. Knowledge of state and local tax can help avoid bad news.
